How to Use Photo Editor

Everything you need to turn your car photos into a professional, studio-quality listing in a few minutes.

1

Start Shooting

Open the app and tap **Start Shooting** or **Camera** icon on the home screen. Choose **Photo Shooting** to capture a new vehicle. You can take exterior and interior photos, change the plate, and upload from your gallery to the studio.

2

Choose Your Car Type

Select the type that matches your vehicle from the Sedan, Hatchback, SUV, Minivan, or Pickup choices, then tap Continue.

Select the car type and start taking photos

Sedan

Hatchback

SUV

Minivan

Pickup

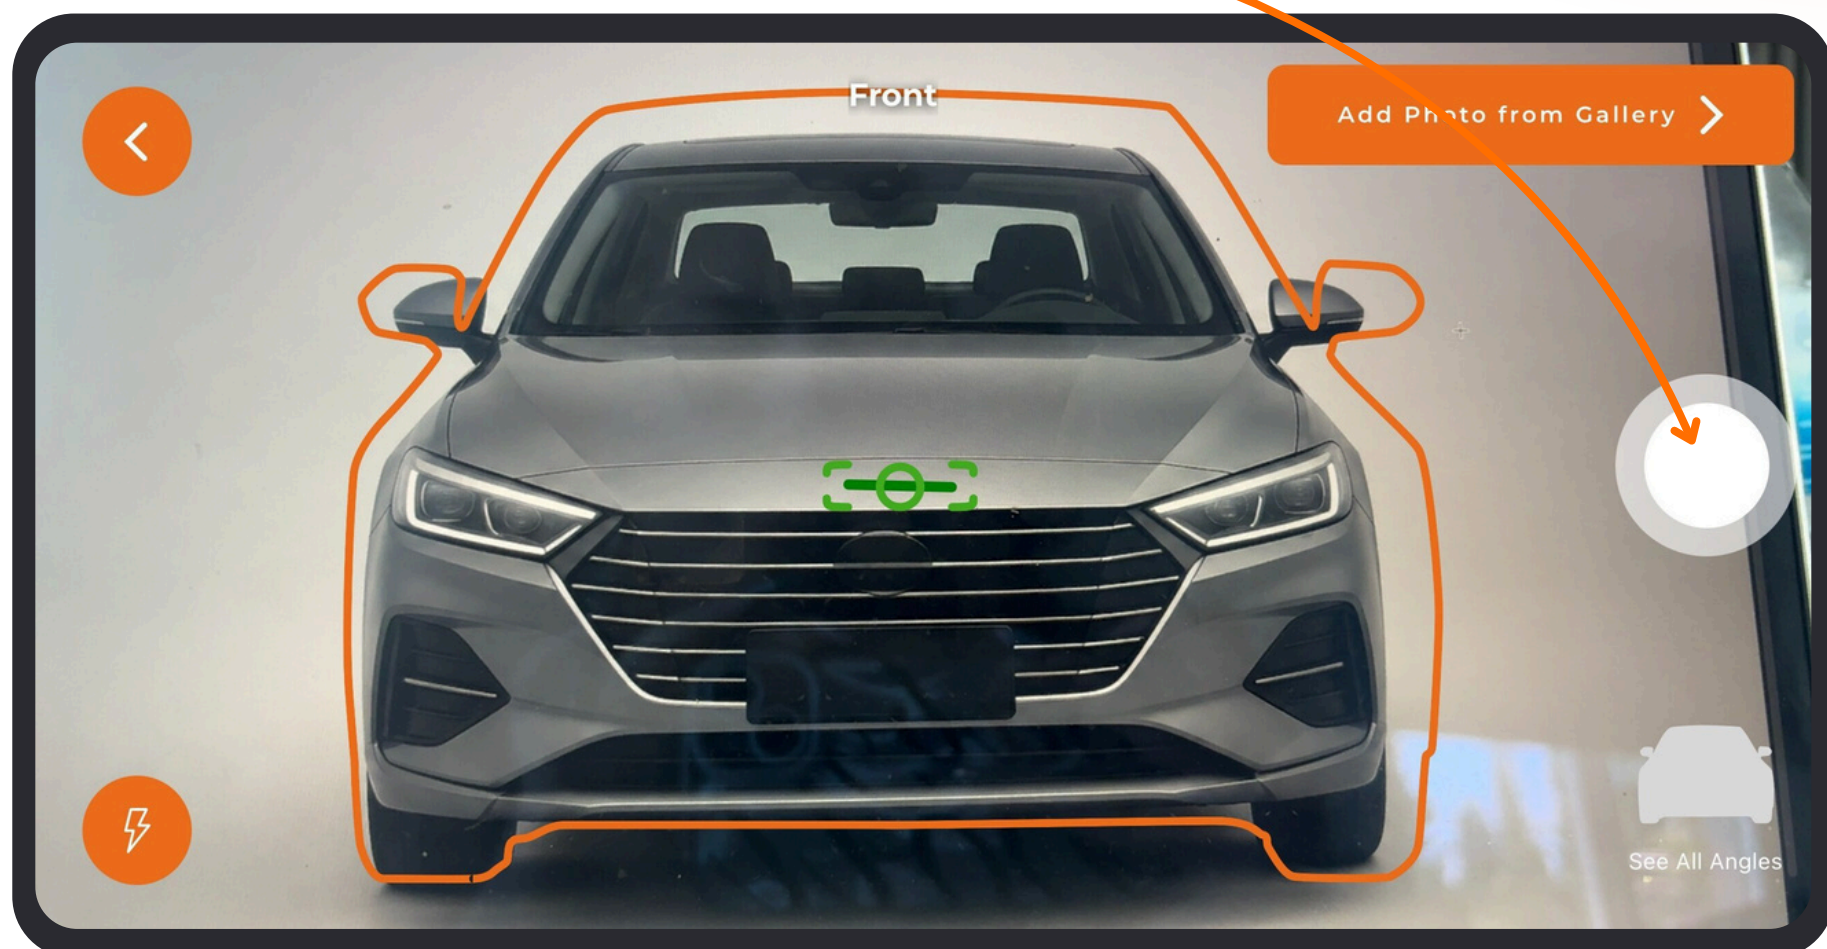

Back

Continue

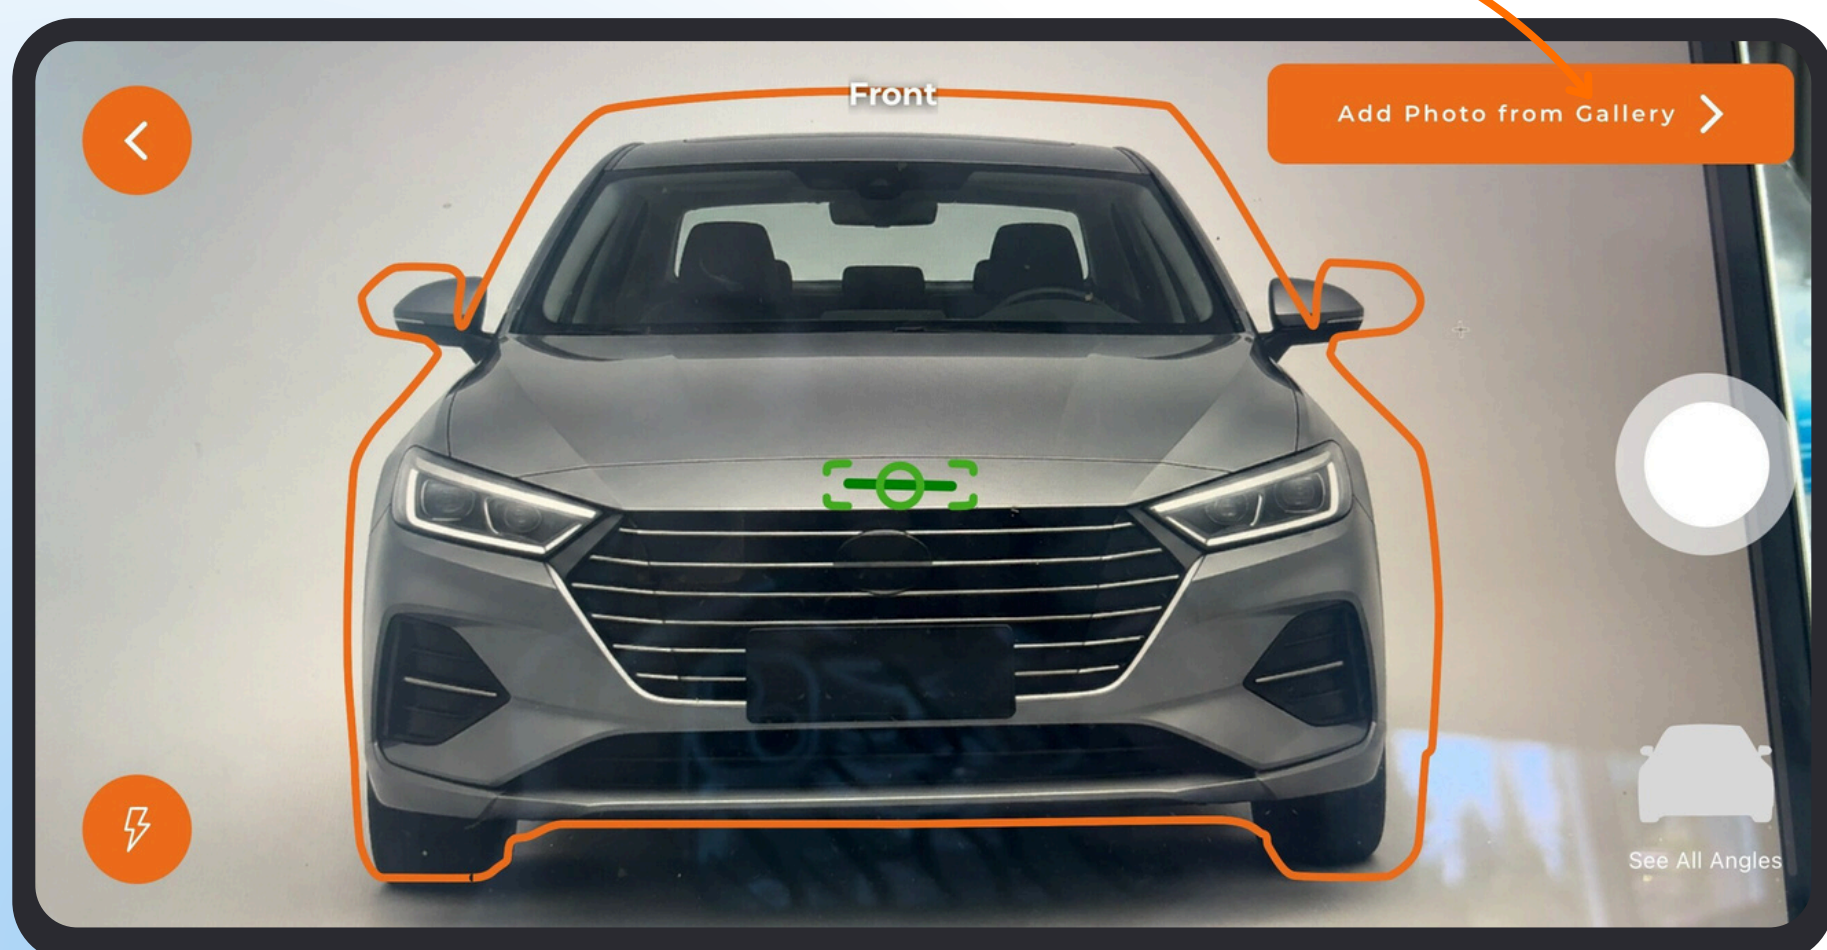

Capture Your Photos

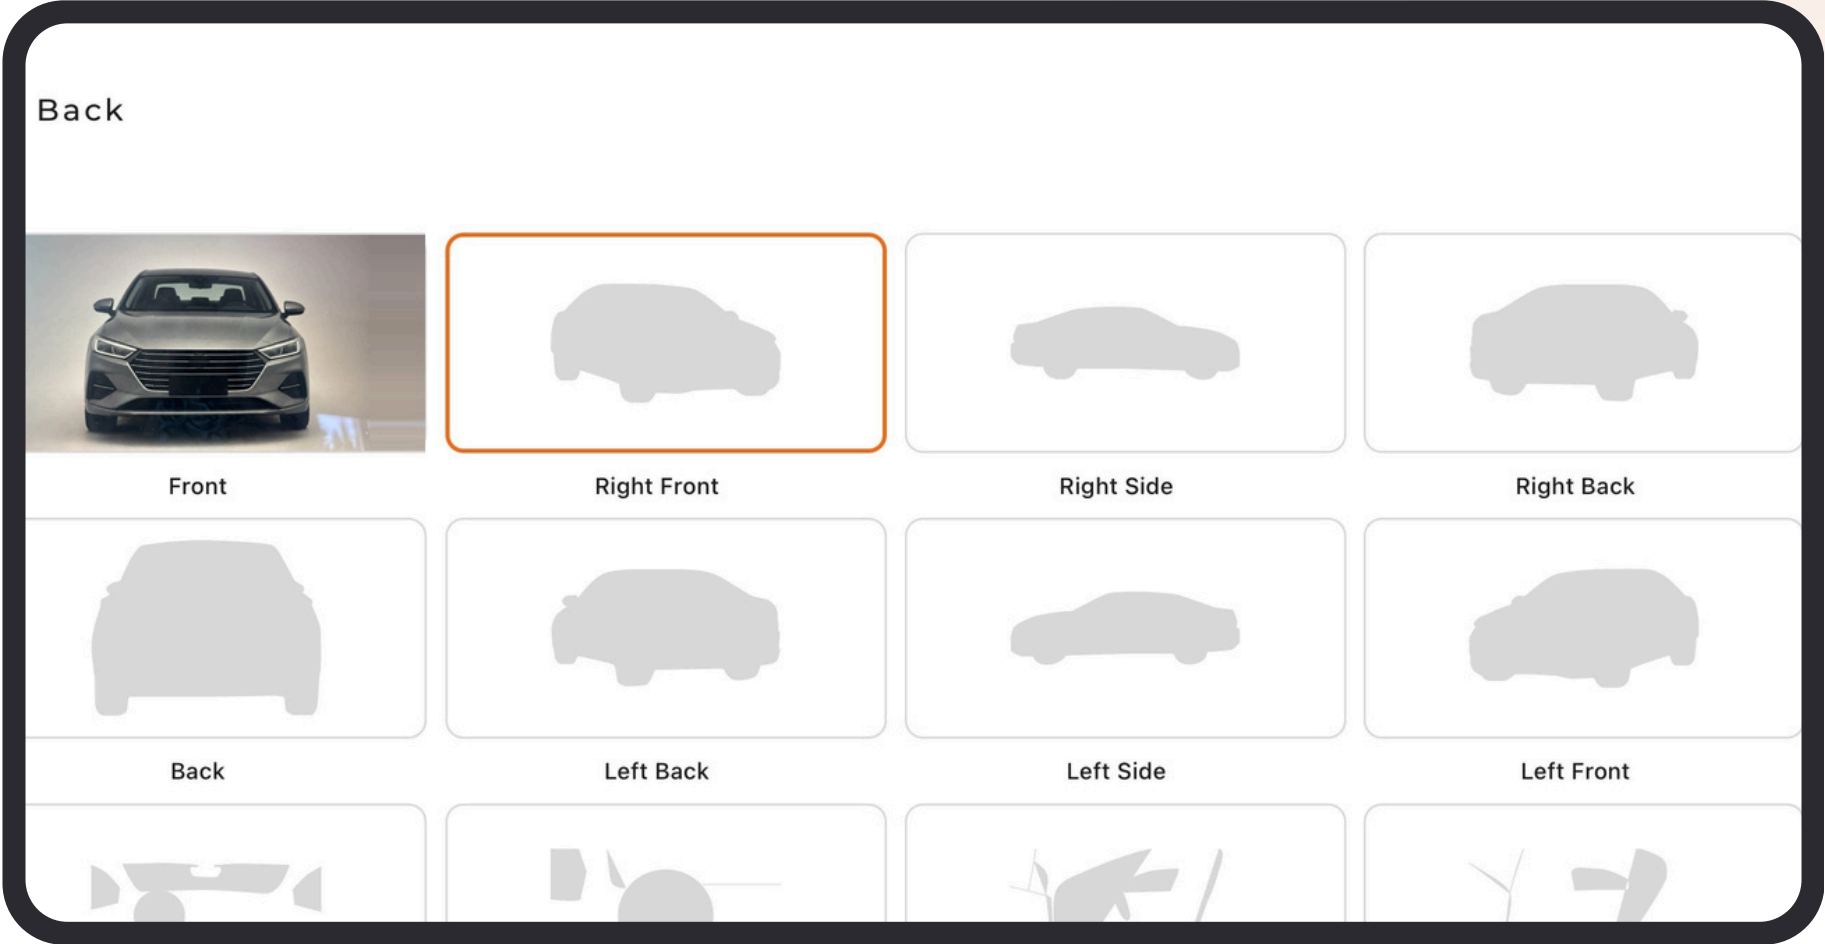

Line up your car with the orange outline for each angle and tap the shutter.

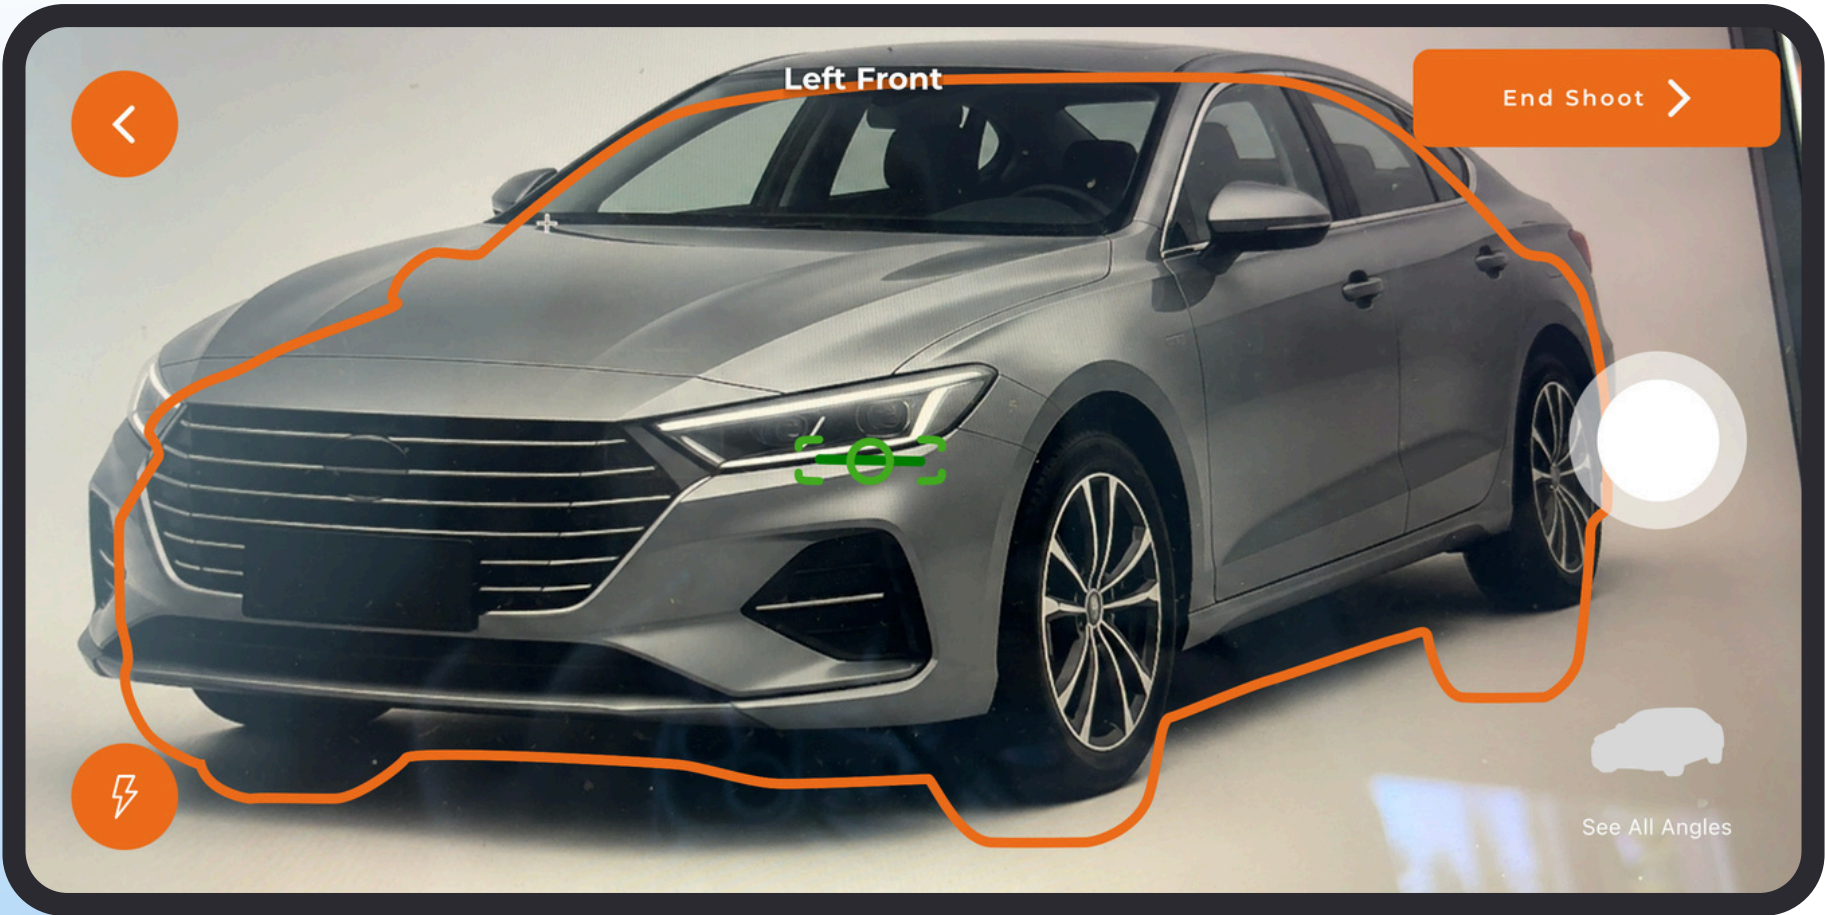

You can also tap **Add Photo from Gallery** to upload an existing photo from your gallery.

Tap **See All Angles** anytime to check which shots you still need.

Once every angle is captured, tap **End Shoot** to move on.

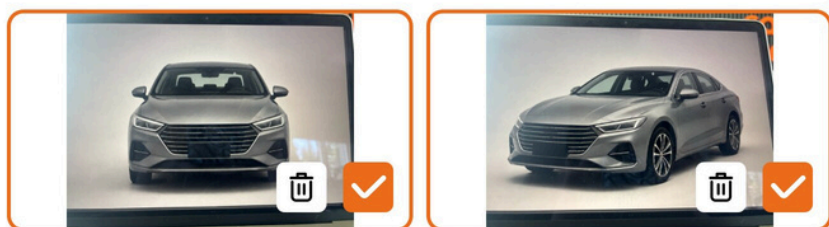

4

Review Your Shots

Check the photos you captured. Delete the ones you don't like to keep, add more from your gallery if needed, then tap Continue.

Add Photo from Gallery

Continue

5 Choose Your Background

Pick a background from Showroom, Indoor, or Outdoor categories or upload your own under Custom. Tap Save and Next.

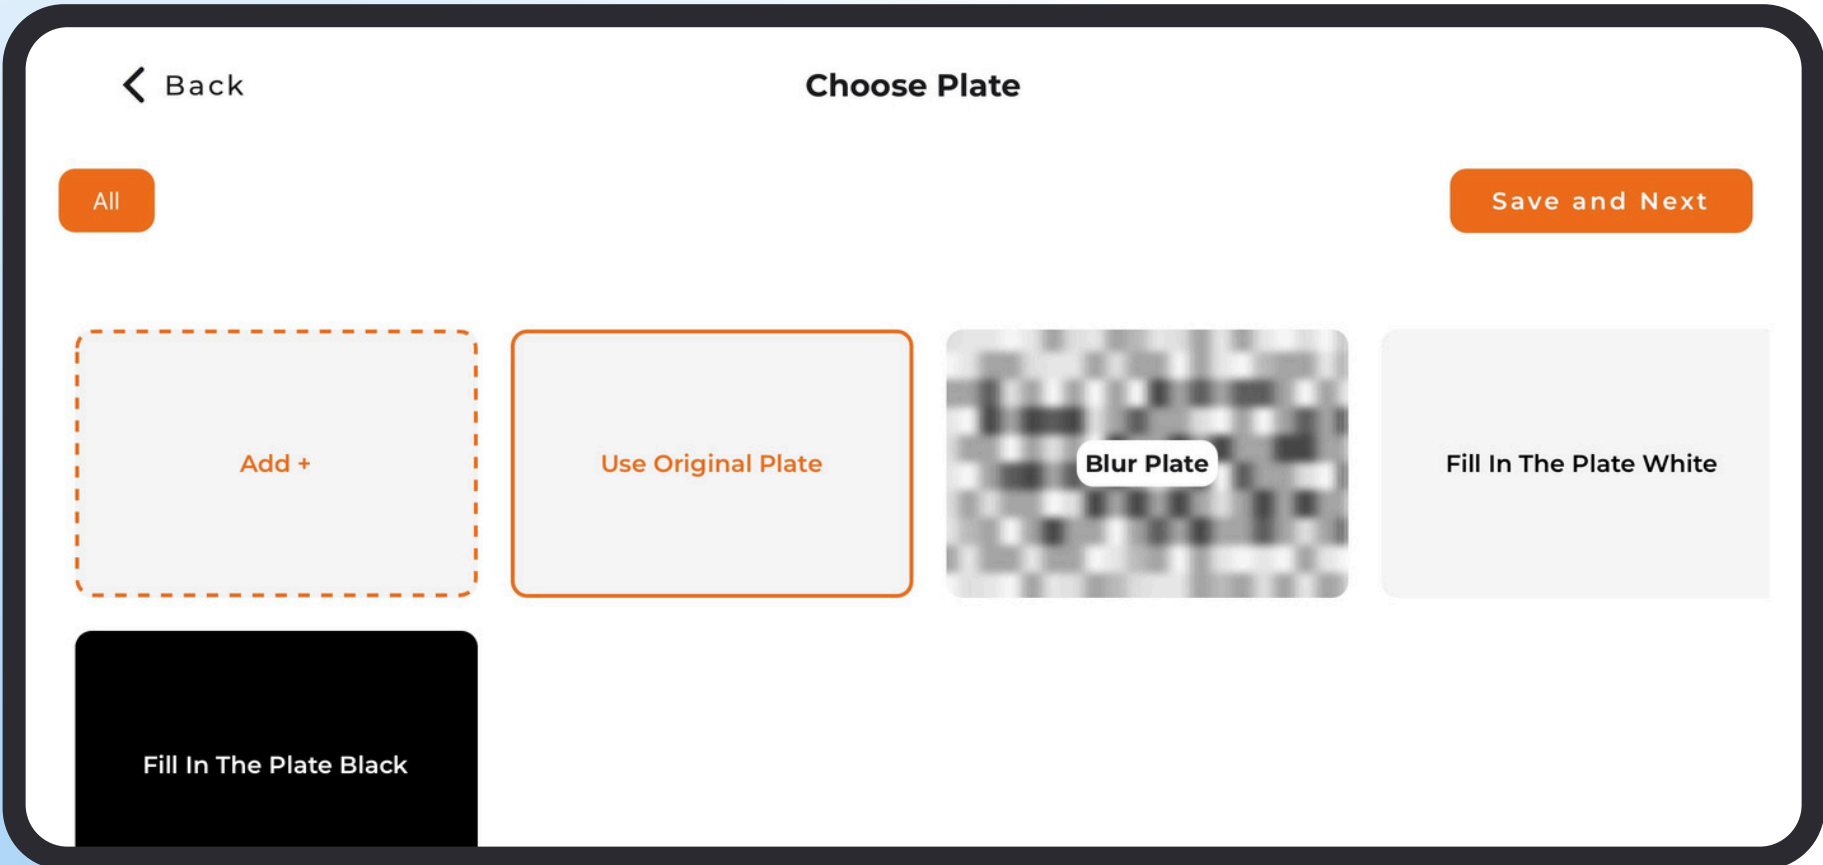

Want a custom background designed for you? Send us your logo on WhatsApp and we'll create it for you, free.

6 Set Up Your License Plate

Keep the original plate, blur it for privacy, fill it white or black, or add your own logo. Tap Save and Next.

Want a custom license plate designed for you? Send us your logo on WhatsApp and we'll create it for you, free.

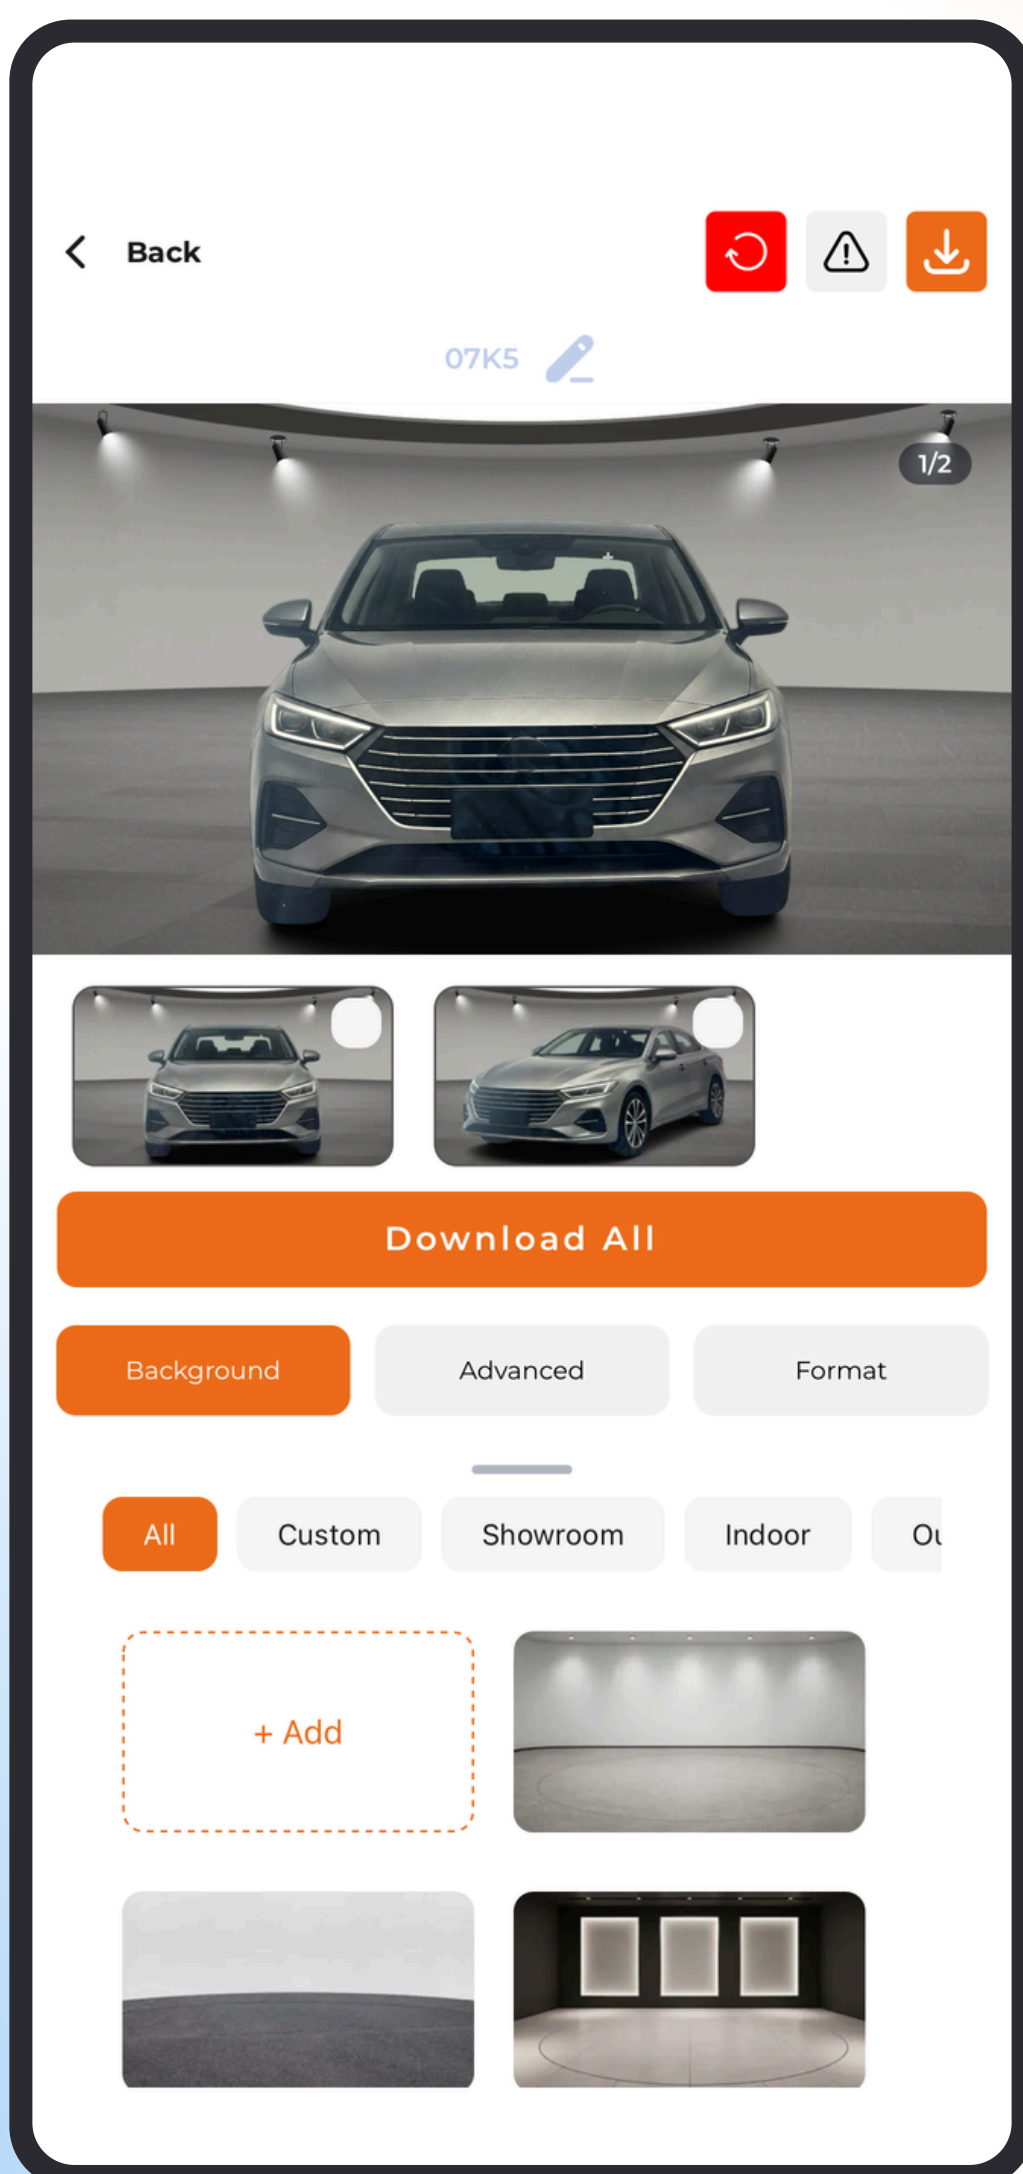

7

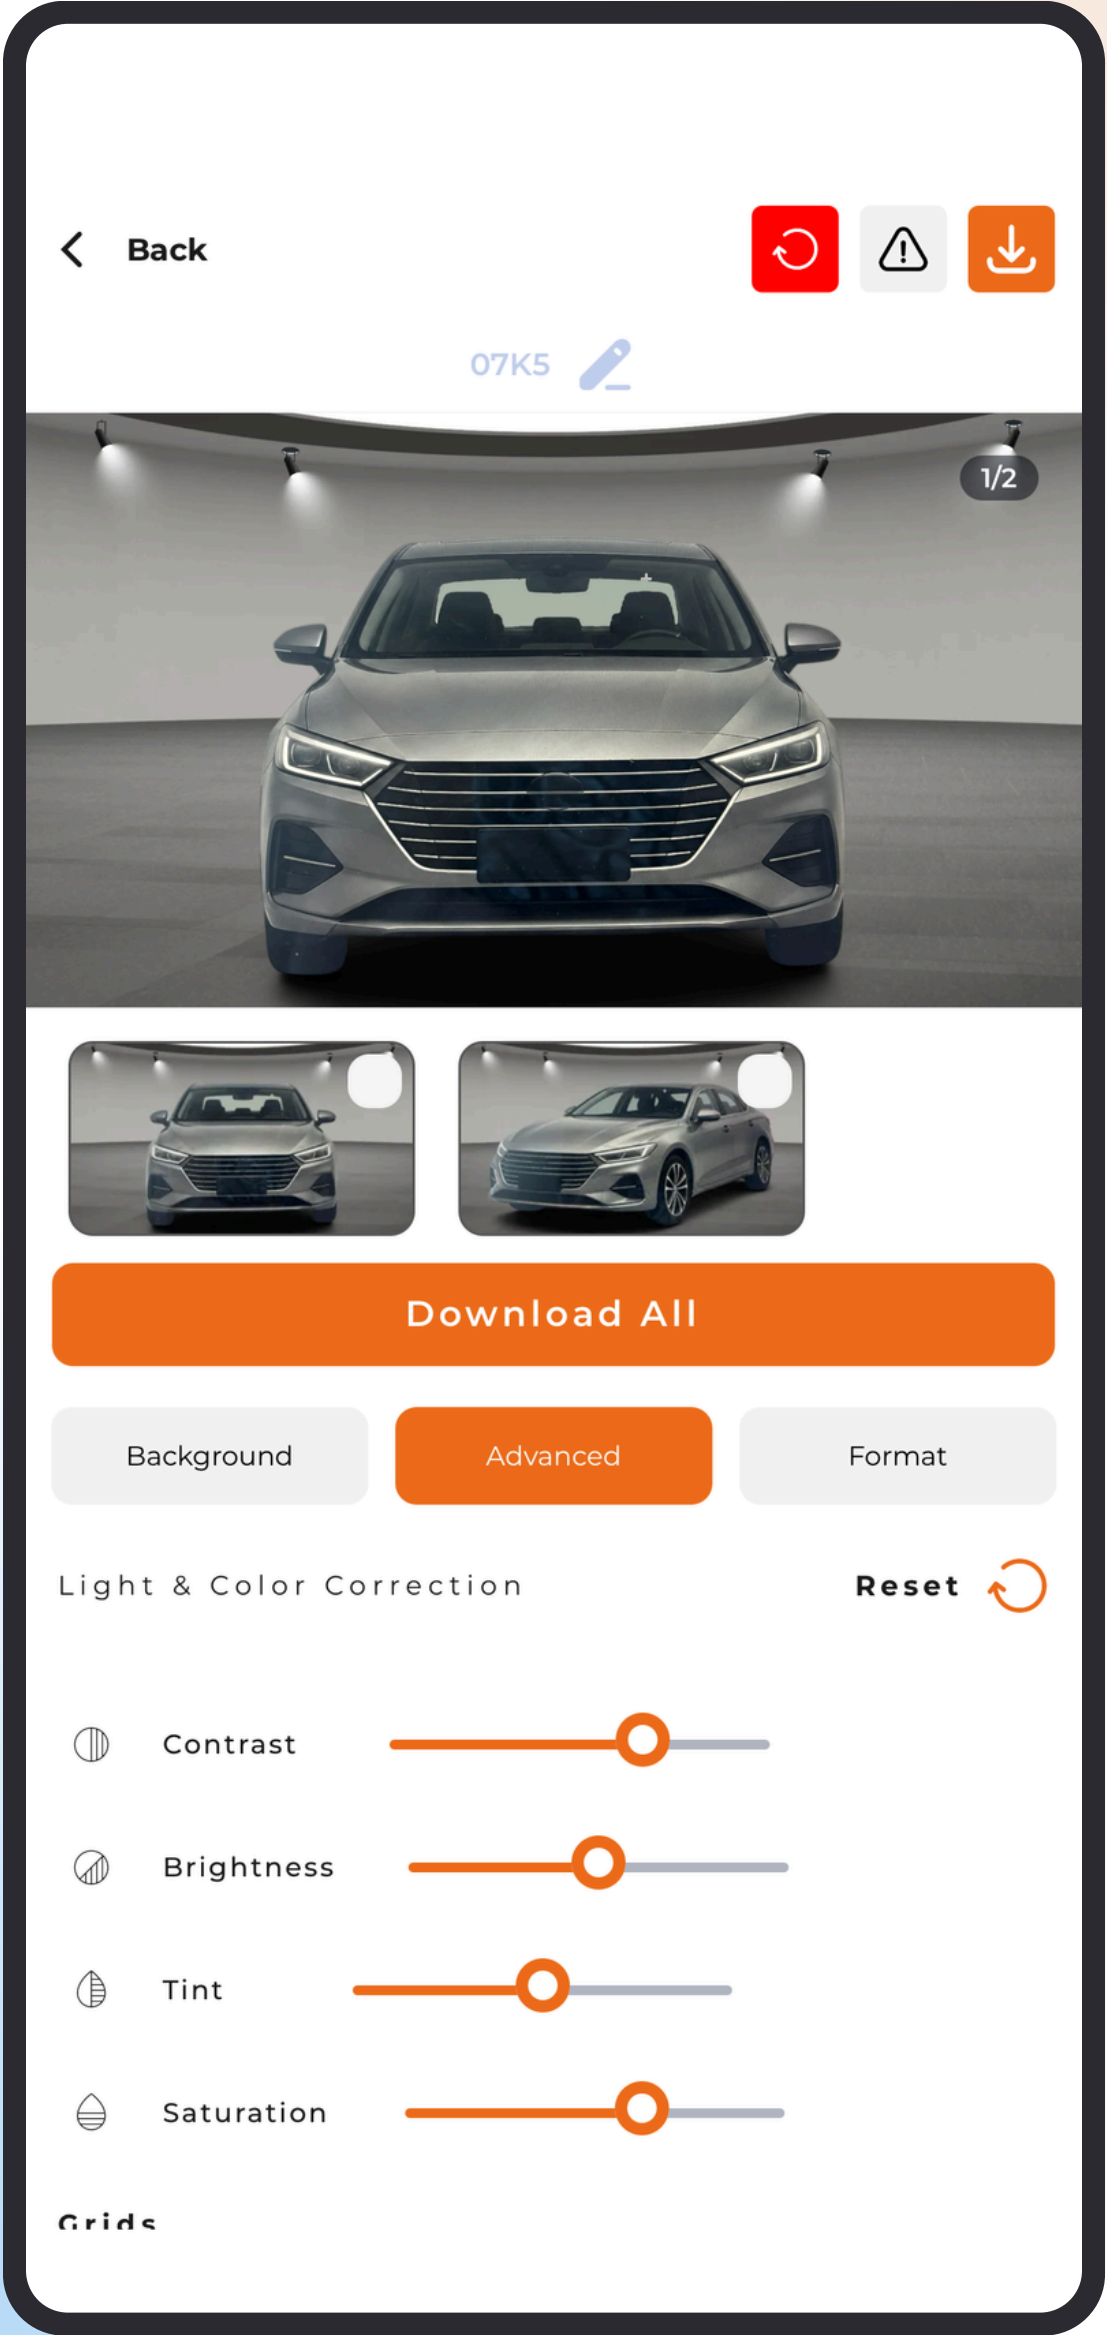

Edit Your Photos

Tap **Edit Photos** on your projects anytime to adjust things, switch your background, correct the lighting, or change the aspect ratio.

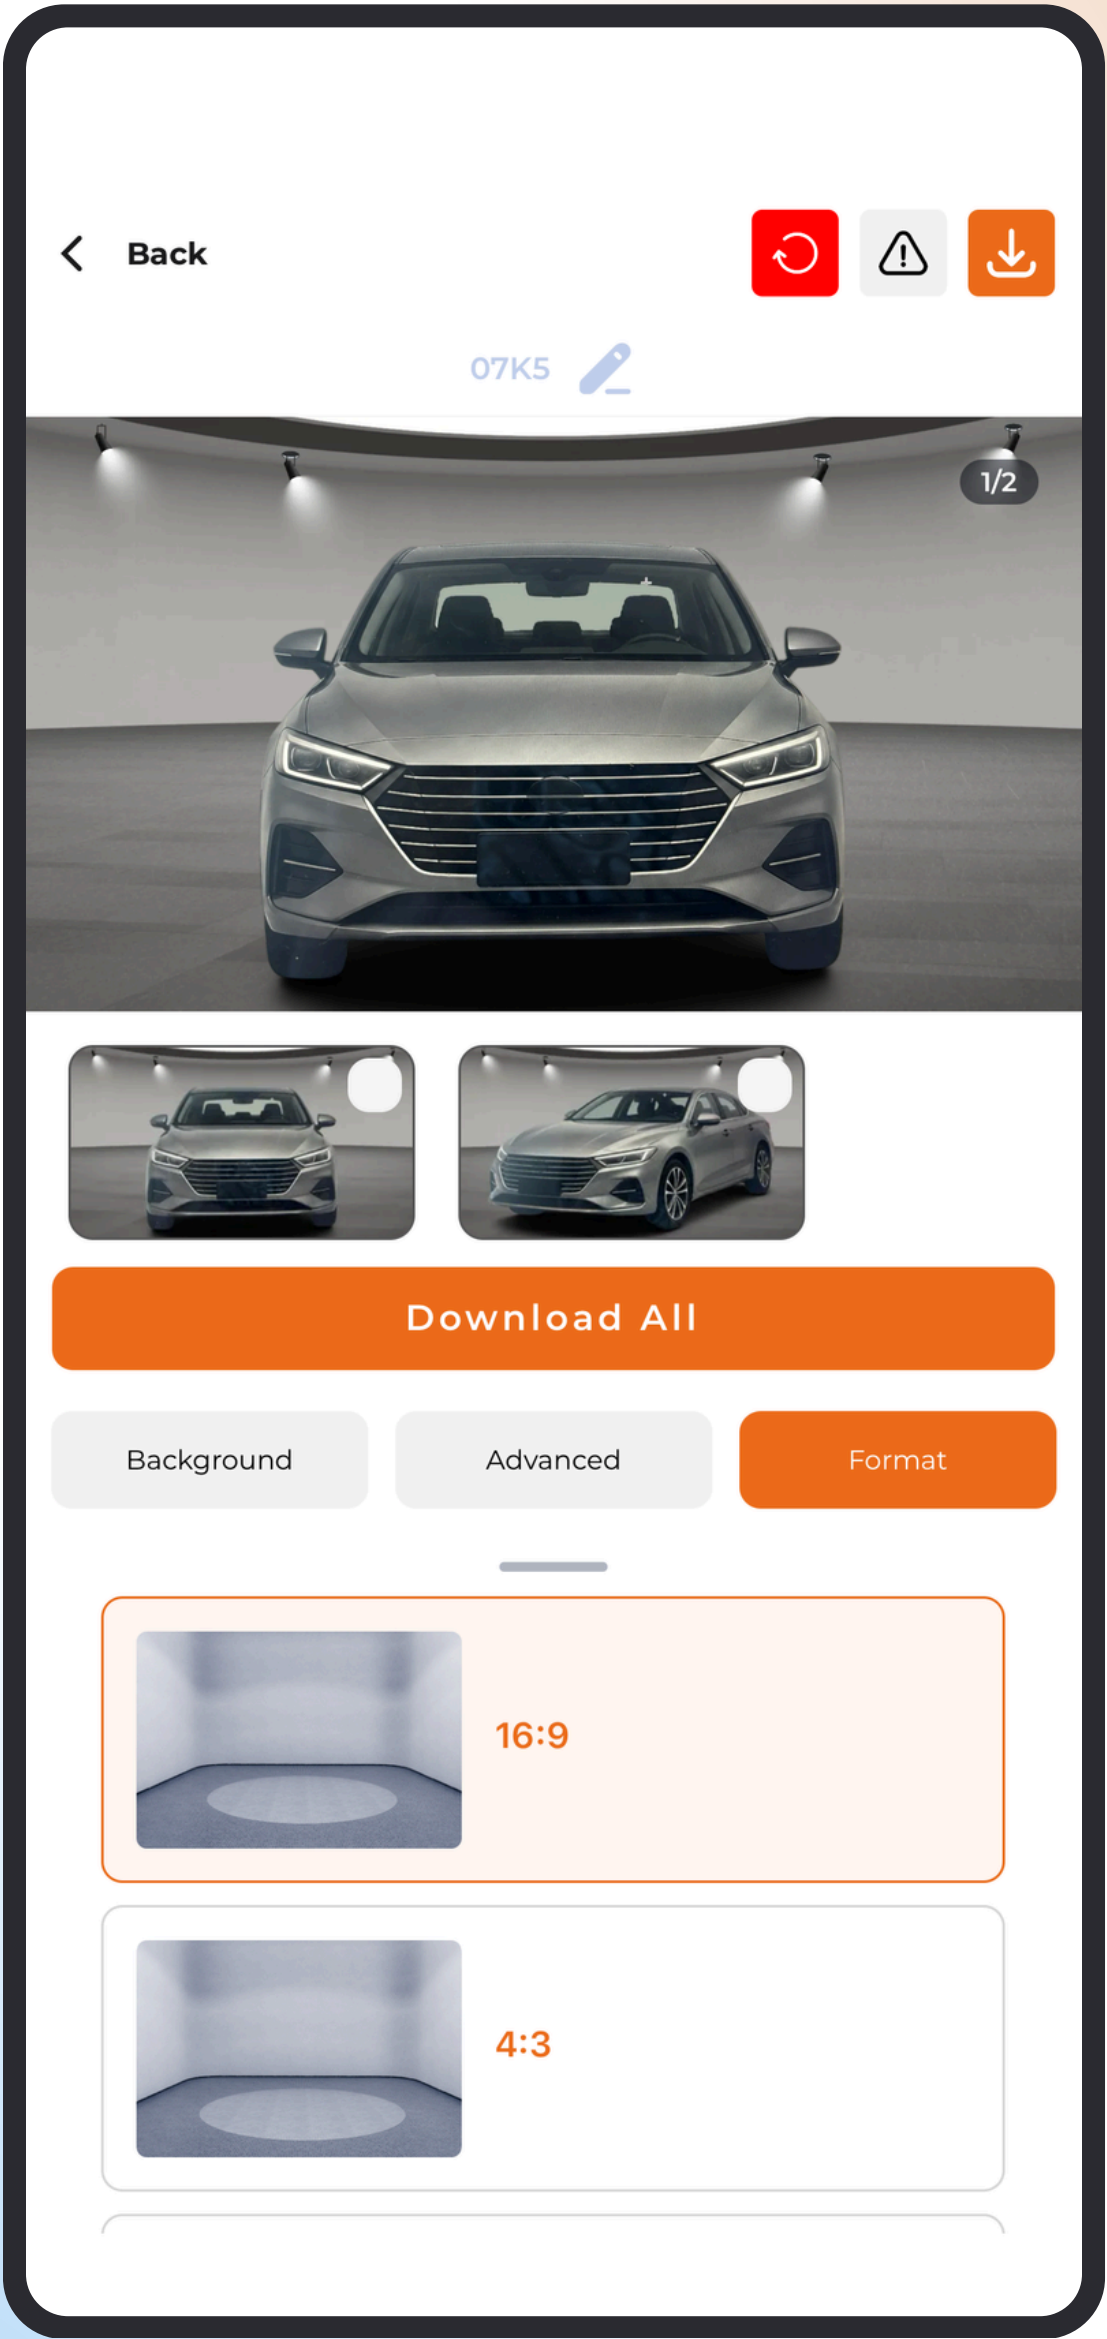

Background: Switch to a different background anytime or upload your own.

Advanced: Change contrast, brightness, tint, and saturation to get the lighting just right.

Format: Change the aspect ratio to match your listing site (16:9, 4:3, and more).

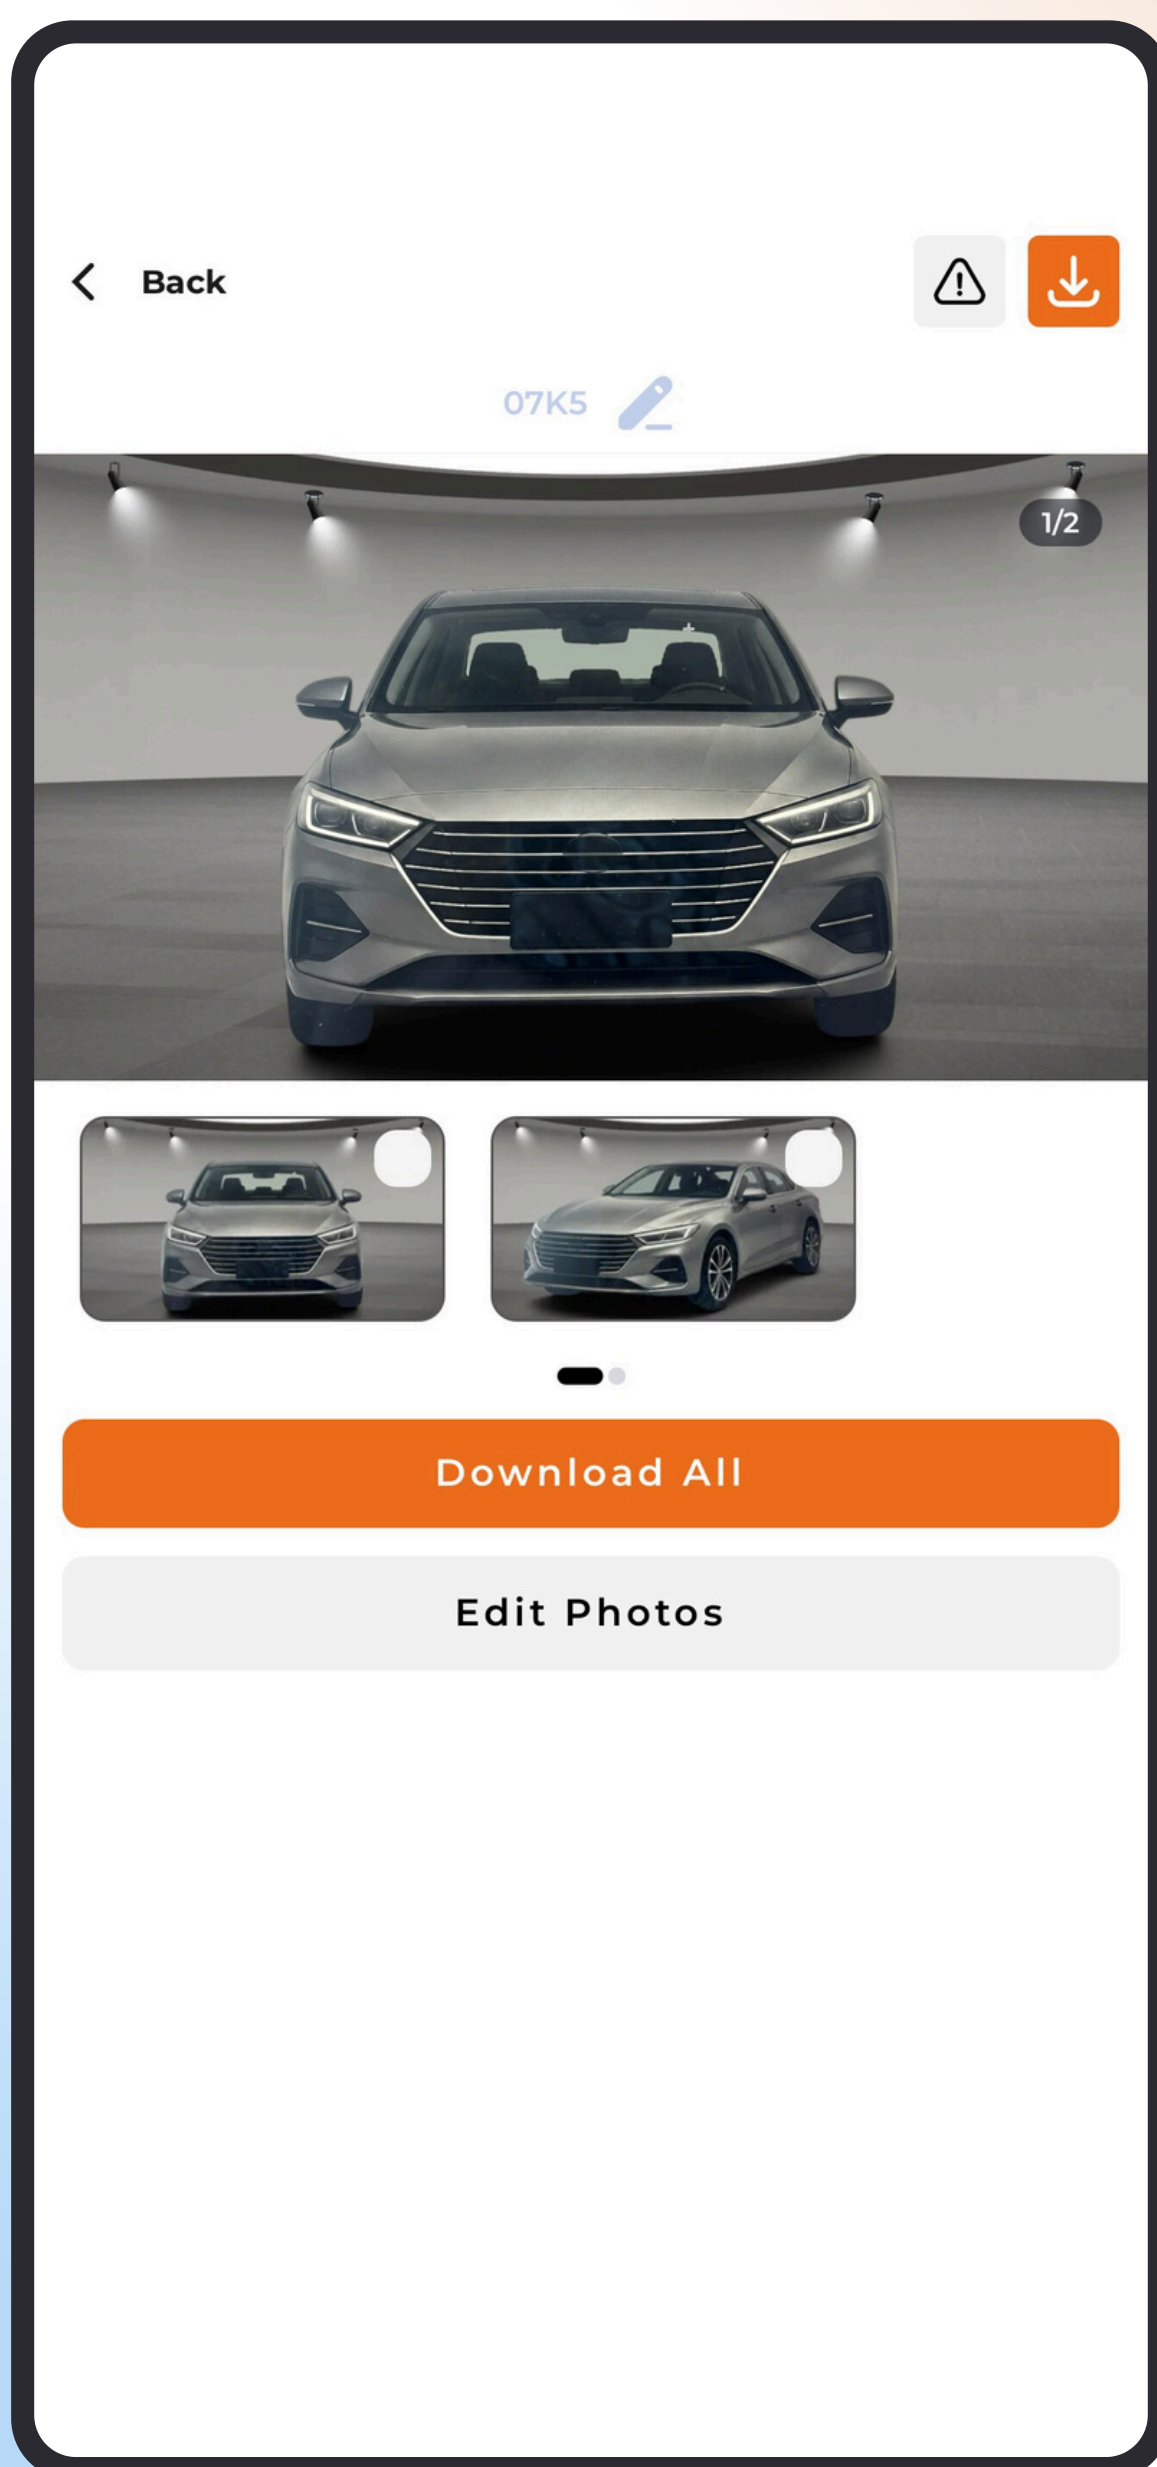

Did you know? Every photo automatically gets a realistic shadow added underneath the vehicle.

8

Get Your Result

Your photos upload and process automatically. When it's done, tap **Download All** to save your photo, or **Edit Photos** to edit it further.
